

This diagram illustrates a cloud-based network system. A central cloud, labeled 14, contains several server racks, labeled 18. The cloud is connected to a network of nodes, labeled 16, which are represented by server racks. These nodes are further connected to user devices, labeled 12, which are shown as people using mobile phones. The network is also connected to a central hub, labeled 10, which is represented by a large arrow pointing towards the cloud. The entire system is labeled 100.
